

If you are interested in learning more about privacy tools and how they protect your online activity, please contact Wren at 307-733-2164 x3113 or via email at wmarvell@tclib.org to arrange an appointment.

Privacy Tools

- Privacy Badger

Privacy Badger is a browser extension installed on Firefox that blocks third party tracking of your web behavior by advertising agents.

- DuckDuckGo

DuckDuckGo is an alternative search engine that unlike Google does not use the data from your browsing history to target advertisements.

- Tor Browser

Tor Browser is a browser that operates on the tor network. It obfuscates internet browsing behavior via multiple layers of encryption. It can also be used to access non-indexed web pages (.onion addresses).

- HTTPS Everywhere

HTTPS Everywhere is a browser extension installed on Tor and Firefox that forces unsecure HTTP websites to use the secure protocol HTTPS.

- OnionShare

OnionShare is a file transfer service that operates on the tor network. The user creates a non-indexed .onion link that hosts the content they would like to share. Anyone with the link may download that content. Must be accessed through Tor Browser.
